Locality Structure Diagram (LSD)

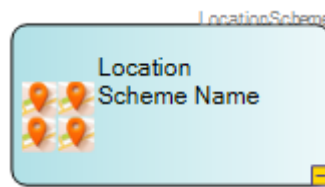

Reason for Existence

- A Locality Structure Diagram depicts the physical locations that the organisation operates in to ensure achievement of its goals.
- It facilitates the deployment and application of infrastructure and Technology at physical locations to enable the Goals of the organisation.
- Determine where the required Infrastructure and Technology will be deployed and utilised.

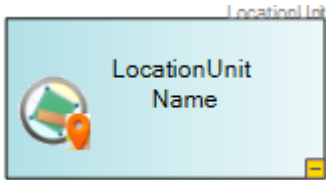

Notation

A physical or virtual location.

A Locality Scheme is the identification of a location structure.

A location unit name reference to the units that form part of the structure of a Location Schema.

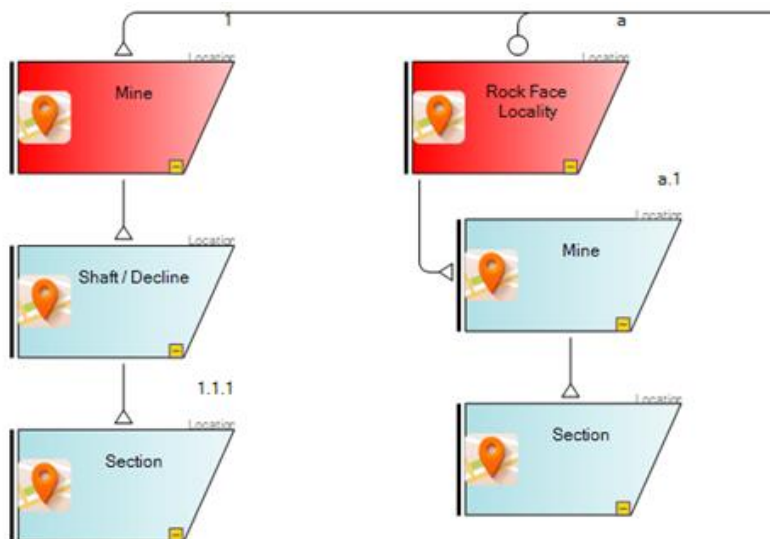

Classification

Decomposition

Example

In the MetaBuilder example the Locality Structure for Mining Operations can be seen.
